Skills

Programming Languages: JavaScript, TypeScript
Frameworks & Libraries: React, jQuery, PixiJS, GSAP
Styling: CSS, SCSS, Tailwind, Bootstrap
Tools: Git, npm, Figma, Adobe Photoshop

Experience

Frontend developer, Skript Software Solutions – Belgrade, Serbia   Mar 2023 – Present

- Led development of new 2D casino slot games, in collaboration with backend developers and game mathematicians, utilizing JavaScript, Pixi.js, GSAP, resulting in a successful launch and positive user feedback.
- Overhauled existing 2D casino slot games by implementing mobile optimization strategies and new designs, leading to higher user retention and increased revenue on mobile devices.
- Worked on the development of multiple SaaS web applications from inception to deployment, utilizing JavaScript, Bootstrap, AJAX (XHR) / Fetch and WebSocket, which met expectations and created new business opportunities for clients. Implemented full-stack tasks by writing PHP endpoints for AJAX and REST API requests, interacting with MySQL databases using SQL, and managing database tables.
- Maintained and updated large back-office web systems for gambling, using jQuery, Bootstrap, PHP, and REST API, adding new features and improving reliability and functionality.
- Created dynamic jackpot, horse and greyhound race screens by combining Figma designs with WebSocket-driven real-time data, enhancing user engagement and information clarity.

Frontend developer, Freelance – Remote   Nov 2022 – Mar 2023

- Collaborated on development for a new e-commerce web shop, utilizing the Saleor platform, React, TypeScript, Tailwind, and Figma designs, which led to sales growth and improved business performance.
- Constructed four interactive SPAs with Next.js and React, while adhering to Figma-defined designs, resulting in a 40% increase in user engagement metrics across platforms based on analytics data.

Frontend developer (intern), Madebynorth – Novi Sad, Serbia   Apr 2022 – Oct 2022

- Developed code to convert design wireframes into website elements under supervision, primarily focusing on frontend development using React and a Headless CMS.
- Built custom WordPress themes and maintained WordPress websites, implementing client-requested modifications to meet their specific needs, resulting in enhanced website functionality and client satisfaction.

Personal projects

Cowboy Slot   github.com/cowboy-slot | cowboy-slot.vercel.app

- Designed and developed a Wild West-themed 2D casino slot game using TypeScript, PixiJS, and Vite.
- Implemented animations with GSAP and optimized assets for performance and scalability across different devices.

Law Office SL   github.com/law-office-sl | law-office-sl.vercel.app

- Single-page application made with React.js, Next.js, TypeScript, Tailwind CSS, i18n.
- Features horizontal scrolling, lazy loading, optimized performance, accessibility, SEO, and email functionality.
